

Aquaglide Paddlesurf Delivers Three Times The Fun

Water sports enthusiasts can now embrace the freedom of surfing, paddling and sailing onboard the new Aquaglide Paddlesurf. Available through safety and inflatable product specialists RFD, the new Paddlesurf stands alongside the Aquaglide range of tow toys, swim platforms and the leading Multisport multi purpose watercraft.

Whatever the weather conditions, the Aquaglide Paddlesurf is a must have for all water sport enthusiasts who crave time spent on the water. The Paddlesurf board design provides a strong and stable base for surfing, paddle boarding and windsurfing while offering strength in construction for durable performance and maximum fun.

At the centrepiece of the Aquaglide Paddlesurf is the skilfully crafted paddleboard designed by legendary Hawaiian board shaper John Amundson. The Amundson 11'3" paddle board is available with an array of accessories to transform the way time is spent on water.

The Amundson 11'3" is the ideal platform for learning paddleboard sports with a broad beam for stability and tough Duractec™ construction to withstand knocks and scrapes. Creating the Duractec™ toughness involves thermo-laminating a thin layer of ASA plastic to the board's bottom and sides while a full-length EVA deck pad moulded to the top of the EPS Polystyrene foam core provides superior traction.

The Aquaglide Paddlesurf board comes equipped with the unique Paddleguard™ rails. Designed to protect the outer edge of the board from wayward paddle strokes, the Paddleguard™ rails contain a high-density rubber laminated to the outer rails of the board to protect the Paddlesurf in and out of the water.

For those wishing to explore the ocean horizon under their own steam, Aquaglide Paddlesurf offers a choice of paddles- the Aluminium Fixed Length and Aluminium Vario Length. The Fixed paddle offers two lengths at 1.87m (75") and 2.02m (81") while the Vario Length paddle spans from 1.62m (65") to 2.1m (84") in length.

Made with the finest 6061 aluminium, the Fixed and Vario aluminium paddles offer outstanding lightweight characteristics and are matched to a strong injection-moulded paddle blade.

The Aquaglide Paddlesurf comes into a world of it's own when matched to the optional Sailing Rigs. Available in two sail rig options each with two sizes of sail, the Paddlesurf can be customised to suit a range of wind conditions and sailboard experience.

Perfectly suited to beginner sailors, kids or those needing a lightweight and affordable sailboard platform, the Pilot Rig offers two sails at 3.1m² and 4.1m²

and features a 2-batten Dacron sail design with a 3.5 meter, 3-piece aluminium mast.

Step up in size and performance to the Reflex Rig with a 4-batten Dacron sail designed as the ideal all-rounder. A 5.1m² and 6.1m² sail is matched to a 4.3m 2-piece epoxy mast with heavy-duty aluminium clamp-on boom with pin adjustable tailpiece.

RFD is a world leading supplier of marine safety products and inflatable watercraft marketed under a range of brand names. Some of these brands include Aquapro inflatable boats, Plastimo boating equipment, ACR electronics and Aquaglide water sport products.

Beginning in 1920, RFD is primarily involved in the supply and service of marine, fire, life support and gas control equipment.

For all information concerning supply and pricing of individual products within the broad range, please contact your regional RFD branch office.
