

Power Equipment Appointed Yanmar Distributor in Pacific

The authorised Australian distributor of Yanmar diesel engines, Power Equipment, has had their distribution territory expanded. Yanmar has officially appointed Power Equipment as the authorised marine engine distributor for Papua New Guinea, the Solomon Islands, Vanuatu, New Caledonia and Fiji.

Power Equipment is now distributing the complete range of Yanmar sail, pleasure and commercial marine engines in these important markets.

“This is a significant accolade for the Melbourne based, Power Equipment,” said Noel Heritage, Business Manager for Power Equipment.

“We have a very strong business relationship with our Yanmar colleagues in Japan, Singapore and around the world. Moreover our track record with the Yanmar brand in Australia is highly regarded.”

“Securing the expanded distribution rights is the natural extension for Power Equipment.”

Already a number of authorised Yanmar dealers have been appointed in most of the new Pacific markets with further appointments set to follow.

Power Equipment is the exclusive and authorised Australian and Pacific Distributor of Yanmar Marine and Industrial Diesel Engines importing product from Yanmar plants in Japan, Asia, USA and Europe. Power Equipment also distribute the Yanmar powered MASE diesel generators and Gori high quality folding sail boat propellers.
